LACK OF UNITY

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, Claim(s) 1-14, and 29-31, drawn to a method of analysis wherein a polymer is bound to a first phase which reflects electromagnetic waves via metallic clusters, classified in at least Class 435, subclass 6 and 7.1.

Group II, Claim(s) 15-28 and 32-33, drawn to a device for identifying a first polymer wherein a polymer with specific affinity for a first polymer is bound via metallic clusters to a first phase which reflects electromagnetic waves, classified in at least Class 435, subclasses 283.1 and 287.2 and Class 536, subclasses 23.1 and 24.3.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature(s).

The claims **as drawn** are related to each other because they comprise a limitation wherein a polymer is bound via metallic clusters to a first phase which reflects electromagnetic waves. However, as a polymer which is bound via metallic clusters to a first phase which reflects electromagnetic waves, as recited in the claims, was known -- see, at least, for example, the abstract of Schalkhammer et al. [WO 98/48275 (1988)] -- the claims are no longer linked by a special technical feature, because, by definition, the special technical feature must distinguish over the prior art. Without the special technical feature the claims lack unity.

3. Because these claims lack unity for the reasons given above, restriction for examination purposes as indicated is proper.

4. A telephone conference was held with Angela Parsons, Ph.D. @ 612.335.5070 on 26 APR 05 regarding an oral election to the above restriction requirement, but did not result in an election. The applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
